

Qair accelerates growth in Poland with full commissioning of “Beehive” solar portfolio and €80 million financing for 203 MW renewable energy projects

PRESS RELEASE

Paris & Wrocław, 26 March 2026 – Qair, an independent European renewable energy company, announces two milestones in Poland: the full commissioning of its “Beehive” solar portfolio and the securing of PLN 350 million (approximately €80 million) in financing from Bank Gospodarstwa Krajowego (BGK) under Poland’s National Recovery and Resilience Plan for projects totalling 203 MW. These achievements position Qair as a key player in Poland’s renewable energy landscape and underscore the Group’s ambition to driving Europe’s energy transition through its local experts.

Beehive: a symbol of Qair’s multi-local approach

Qair has successfully commissioned its “Beehive” portfolio: a 14.6 MW solar project comprising thirteen photovoltaic farms strategically located across Poland. The project’s name and concept symbolize the integration of multiple smaller energy sources into a cohesive system, working in synergy to generate energy locally.

The Beehive project exemplifies Qair’s ability not only to benefit the national energy grid but also to respond to the energy needs of local communities, embodying Qair’s multi-local approach.

€80 million financing to fuel 203 MW of renewable energy projects

Building on its momentum, Qair has secured PLN 350 million (€80 million) in financing from [Bank Gospodarstwa Krajowego \(BGK\)](#), under the Energy Support Fund of [Poland’s National Recovery and Resilience Plan](#), part of the EU’s Recovery and Resilience Facility. The funding will support the construction of three new renewable energy projects, totalling 203 MW:

- The 18 MW Jenków wind farm
- The 80 MW Wierzbica solar farm
- The 105 MW Grudziądz solar farm

First constructions are set to begin in the second quarter of 2026, with commissioning expected in 2027.

By accessing this EU-supported funding, Qair strengthens its European growth strategy, demonstrating its ability to align local projects with continental energy transition objectives.

About Qair in Poland

Qair has been operating on the Polish market since 2015 and currently operates over 550 MW of installed capacity. The company also offers energy sales to large businesses under long-term cPPAs. Its strategic goal is to reach 1 GW of installed capacity in the country by 2027 and 3 GW by 2030.

About Qair

Qair is an independent renewable energy company developing, financing, building, and operating solar, onshore and offshore wind, hydroelectric, tidal energy, renewable hydrogen production and storage projects.

With 1.7 GW of capacity in operation or under construction, the group's 780 employees are developing an additional 33 GW pipeline in 20 countries across Europe, Latin America and Africa. Our ambition is to become an independent leader in responsible energy.
